

To Whom It May Concern:

First I want to say thank you for your hard work in protecting people like me from companies that may have intentions other than good in order to gain a profit.

I have never been in the direct selling industry before, but after my initial introduction to this remarkable industry I have not only had the privilege to introduce people on a daily basis to a remarkable product that is allowing them to have a better way of life, but this industry has also provided me and my family with better health and financial freedom.

Although the proposed law is good in nature, the adverse reactions to me and my family will be detrimental. The seven day waiting period will turn a frown on the way I conduct my business on a daily basis. I would have to reaffirm a potential customer through the waiting period and possibly lose a customer because of this stipulation.

Partners and customers come to me on a daily basis telling me about the awesome results that the product I offer them is doing for their health as well as the income that provides choices that they may not have had prior. I know that I am changing lives on a daily basis and I thank God everyday for bringing this opportunity into my life.

Again, although the intentions are good in nature, the adverse reactions will directly affect my business in a profound way. In my business there are already tremendous skepticism and I think that this ruling will only add more undue doubt in people's minds about our business.

Thank You for Your Time.

George & Pam Smith, Jr.
